

Memories of SAHITHI'S.....

Empowerment of Sahithi Foundation Ngo

Born from Experience

In 2013, the Sahithi Foundation emerged from a place of deep understanding and lived experience. Growing up in a family facing economic hardship, our founder balanced work and study while navigating the limited opportunities available in a government school. This journey revealed a painful truth: countless talented rural students remain unaware of the educational pathways that could transform their lives.

That pain became purpose. The determination to ensure no child would face those same barriers ignited a movement.

A Promise to Every Girl

What began as a private degree college, founded with friends who shared the same vision, has blossomed into something far greater. The Sahithi Foundation treats every girl child as precious, deserving of opportunity, health, and empowerment. We work tirelessly in rural communities, providing not just education, but comprehensive support—training programs, healthcare initiatives, and employment opportunities that break cycles of poverty.
